

Little Dome C

Beyond EPICA Oldest Ice Drilling Site (75.29917 °S, 122.44516 °E)

First Visit to Little Dome C Successfully Completed

News Flash — Preliminary Site Inspection Confirms Promising Conditions

A team of advance personnel has successfully completed the **first visit** to Little Dome C as part of the ongoing preparations for the upcoming field season. During this mission, a preliminary inspection was carried out to assess the general state of the site.

Initial findings are positive: overall conditions at the site appear favourable, with only substantial snow accumulation to be cleared before further setup operations can proceed.
