**EastGRIP ice core processing 2023
week 1 (25/09/2023)**

In the week September 25th - 29th we cut the S1 firn core from the EGRIP site at the AWI cold room facilities. We processed the

- bags #5 to #111 with cuts for
- PP, CFA, Archive and IGE-Isotopes.

The processing team was highly motivated and hardworking and benefitted from the prudent and careful preparations beforehand by Maria, Denise, Melanie, Johannes, Constance, Jakob, Sören and Iben. Thus, the processing went very smooth and quick and people had time to enjoy Bremerhaven with sun light.

The week closed with a nice lunch at AWI on Friday.

Processing team: Maria Hörhold (AWI), Joel Savarino (IGE), Bärbel Seth (UBern), Richard Oliveira (UManitoba), Constance Oberdieck & Niclas Linder (AWI);

Support + box logistics team: Denise Diekstall, Sören Geil & Johannes Freitag (AWI)

Figure 1: The first week's cutting dream team: Niclas, Maria, Bärbel, Constance, Richard and Joel, not on the figure - the background dream team: Denise, Sören and Johannes
