**EastGRIP ice core processing 2023**

**week 6 (30/10/2023 – 3/11/2023)**

Week 6 was a short one for processing, as the Egrip Science Workshop and Steering Committee Meeting took place here at AWI in Bremerhaven. We managed to do 2.5 days of processing, also with the help of AWI staff standing in for those who wanted to join the meetings. Thus, additionally to last week's crew we had Sören, Elis, Julian R., Denise and Manuela joining the processing team on short notice. Jon Arrizabalaga started on Monday as regular processing crew and will be with us until the end of the processing.

First Processed Bag: 4607

Last Processed Bag: 4697

Week 6 was also a short week for the water isotope CFA, 2 days prior to the steering committee meeting.

Start bag 4202

End bag 4253

At the end of the week we said goodbye to Iben, Marie, Tamara, Niclas and Henrique. Many thanks for your good work and the nice time we had as a team.

Johannes & Daniela
